

# GUARDIANS OF HEALTH: THE ESSENTIALS OF DISEASE PREVENTION

*As healthcare continues to evolve in the post-COVID-19 era, so does the professional and ethical responsibility of the dental hygienist. Today's patients are more informed than ever about infection control, disease risk factors, and the importance of prevention. This is the moment to reaffirm our profession, focusing on the critical role dental hygienists play as preventive and infection control specialists in allied healthcare.*

Join Katrina M Sanders, RDH, as she dives into the latest advancements in disease prevention. This dynamic course explores cutting-edge techniques available to dental hygiene professionals to control, prevent, and manage disease. Participants will walk away with advanced knowledge of futuristic methods in disease prevention, ready to elevate their practice and patient outcomes.

Special Note: While this is a clinical course, it's one that all dental team members enjoy taking, as it covers the diverse ways in which dentistry plays a vital role in preventing disease. From hygienists to dental assistants, each team member can benefit from understanding the broader impact of disease prevention strategies, patient education, and how their roles contribute to long-term patient health. This course offers a comprehensive look at the intersection of clinical practice and preventive care, making it relevant and engaging for the entire dental team as they work together to improve patient outcomes.
