

# POCKETS, PARADIGMS AND PROTOCOLS: AN APPROACH TO PRECISION PERIODONTICS

*The 'gold standard' of periodontal disease management is pivoting as patients are looking to non-invasive approaches to safely, efficiently and definitively treat disease and subsequently promote health.*

Despite our best efforts to study, treat and manage diseases of the periodontium, research continues to indicate increasing prevalence of oral inflammatory conditions, unpack challenges with our existing protocols and challenge the dental profession with paradigm shifts.

The ever-changing environment of health care delivery is now focusing on the convergence of precision medicine, implementation science and learning health care system studies to synergistically improve clinical health outcomes. While our medical colleagues have adapted these paradigm shifts into avant-garde approaches to patient care, dentistry is now called upon to become part of this trailblazing movement.

Join periodontal hygienist and international speaker Katrina M Sanders as she discusses a revolutionary concept of 'Precision Periodontics', critically examining the current landscape of oral inflammation with a deep focus on contemporary interventions aimed to transform non-invasive care for the periodontal patient, improve clinical outcomes and optimize management of periodontal diseases.

## Learning Objectives:

- Define implementation science and identify how this emerging discipline is focusing treatment strategies
- Discuss precision medicine and the evidence-based interventions available to improve clinical outcomes
- Evaluate paradigm shifts in the provision of periodontics and the trends in inflammatory management for the dental professional
- Review the results of optimal therapy in a non-invasive approach to treating periodontal disease

## SUGGESTED AUDIENCE:

Clinical Team Members.  
Excellent for: Dental Hygienists

## SUGGESTED FORMATS:

Partial Day Lecture | Full Day  
Workshop
