

WARNING: GRAPHIC PHOTOS AHEAD!

While the rest of the world may quiver with churned stomachs, one of the best traits of a dental professional is their excitement and joy around graphic oral diseased cases

While the rest of the world may quiver with churned stomachs, one of the best traits of a dental professional is their excitement and joy around graphic oral diseased cases. Despite the oftentimes 'colorful' nature of oral disease, these cases offer an incredible learning opportunity, particularly in the importance of early and definitive intervention. Join Katrina M Sanders, RDH, BSDH, M.Ed, RF for a dental rendition of 'Dr Pimple Popper' as she presents graphic photographs of surgical cases requiring periodontal therapy.

This will be your final warning: there WILL be graphic photos ahead!

Special Note: This program is specifically designed for periodontal practices seeking to improve referral rates and enhance patient care. By focusing on advanced clinical observations that warrant periodontal referrals, your top referral sources will gain the expertise to recognize crucial indicators earlier and collaborate more effectively with referring providers. With high-level education, they will be equipped to elevate their practice, increase patient trust, and strengthen your referral network. This is your opportunity to foster stronger professional partnerships and grow your practice through a focus on exceptional care and increased referrals!

Learning Objectives:

- Review appropriate surgical cases for periodontal referral.
- Identify options for treatment planning of detailed periodontal therapy in an efficient, detailed and strategic method.
- Describe short and long term goals for periodontal patients that are measurable and attainable.

SUGGESTED AUDIENCE:

Clinical Team Members.
Excellent for: Dental Hygienists

SUGGESTED FORMATS:

Half Day Lecture
